## I'M A SAVER.

### THE ULTIMATE COMMERCIAL FITNESS TREADMILL

You want the best for obvious reasons. The Mercury will benefit your members and your bottom line. Your members will appreciate the smooth and comfortable running surface and you will appreciate making the most of your floor space and spending time on everything but maintenance.

### COMFORT FOR YOUR MEMBERS

There are conventional treadmills and then there are Slat Belt treadmills by WOODWAY USA. Our patented running surface is unlike any other. Your members will rave about how great it feels to run on the rubberized slats, their joints and connective tissues will also take notice. What they will not notice is noise. The Mercury is near silent, they can carry on a conversation with their neighbor or turn down the headphones a notch.

The Mercury's running surface provides ample space for users and best of all there is no hood, your members can utilize the full running surface with a totally natural gait pattern.

### KEEP YOUR MEMBERS ENGAGED

Add a Personal Trainer Display, 19" HD TV or engage, connect and entertain members by adding the optional Netpulse personalized media platform. On Demand TV, On Demand Music Videos, Personalized Playlists, Online Workout Tracking and Cable TV will keep them coming back to the Desmo time after time. Best part is the Netpulse media platform is regularly updated so they will not grow bored with the same old same old.

### LOWER OVERALL COSTS

The Slat Belt running surface lasts up to 150,000 miles without a single belt change or deck swap. It was designed to make up for conventional treadmills shortcomings, most notably wear and friction. The rubberized slats are built like a tank, literally. With 114 ball bearings the belt glides, which results in years of life with very little maintenance and up to 50% in electrical savings. There is no need to adjust and tension the belt, our design utilizes tracking rollers and a toothed pulley.

The result, the lowest maintenance and lowest total cost of ownership of any treadmill, so you can worry about more important things, like your members.
